2018
Victoria, BC
CANADA

**MariTech Canada's National
Marine Exhibition & Conference**

HOSTED BY THE VANCOUVER ISLAND BRANCH OF
THE CANADIAN INSTITUTE OF MARINE ENGINEERING

Victoria Conference Center, Victoria, BC, Canada
April 18 - 20, 2018

FOR WIDE DISTRIBUTION

www.cimare.ca

Since 1976, the **Canadian Institute of Marine Engineering (CIMarE)** has used its national, annual conference, **Mari Tech**, as an invaluable tool in providing a high quality professional development experience for marine professionals involved in all sectors of the marine industry.

Mari Tech 2018's theme is "Honing the Leading Edge"

Exploring emerging technology with an emphasis on design convergence and operator experience. LNG fuel, hybrid propulsion and bilge water management are sectors which have begun to mature; we look forward to sharing real world examples of this tech in action.

Hone: to make more acute, intense, or effective

Emerging Technologies are becoming mature, with operators learning from varied experience. Manufacturers and regulators are receiving feedback from end-users. It is the effect operational experience is having on emerging technology that we wish to explore.

Submit your expression of interest to papers@mt18.ca. Include a brief synopsis of the presentation, and a short biography of the speaker.

Deadline for submissions: January 20, 2018
